INTERNSHIP

January 2023, the new year, the new semester has started. This time we must do full-blast face-to-face classes, and I must commute daily. I need to start preparing myself around 3:00 pm because my class starts at 6:00 pm and I only have an hour and a half for the trip since my school is in Mandaluyong. That became my routine since the beginning of my classes. If I were asked my opinion about my situation right now, having face-to-face classes is more expensive than having online classes because having online classes only costs fifty to a hundred pesos only per day than having face-to-face classes with a budget of a hundred and fifty pesos for a 3-hour class for a day. Sixty pesos for the back-and-forth commute then the remaining is for other expenses such as food. But experience-wise, I might say that having a face-to-face have a real deal than being online due to the fact that we can be able to communicate with our professor instantly without communication barriers.

Then upon orientation, I've been informed that since I am already in my third year we are required to do on-the-job training or internship inside or outside the school in compliance with our subject called COE. We must render 300 hours in the industry to complete the needed requirements. And fortunately, as per writing I already found where I can be able to render those 300 hours in the office and which is inside the campus at Research and Development Center. And my schedule is from 8:00 am to 5:00 pm which is very convenient for me since I don't need to render additional hours for commuting because I am already inside the campus. Then as for the task, nothing to worry about because it is still connected to my course. Honestly, finding a company is so hard but thankfully I found one.
